WORKSHOPS

*Below are some suggested topics, but there are many more.
Just ask us!*

NEW! ipads and Apps for the Classroom

How to use ipads in your language classroom. BYO device or use ours.

How to Make and Use Spreadsheets

Explores how to store data in Microsoft Excel spreadsheets.

Planning for the Multilevel Classroom

How to plan lessons and teach a class made up of students with different levels, abilities, proficiency etc.

Lesson Planning

Using various templates, we look at how to plan lessons and then practise creating some for our classes.

Understanding Text-Types

Looks at features of different text-types and how to teach these explicitly in a language class.

Assessment and Reporting

What do we assess, how to we assess and how to we provide feedback and report on learning?

How to Make a Worksheet in Microsoft Word

Covers basic computer skills including formatting and word processing and making worksheets.

The Interactive Whiteboard

How to use the interactive whiteboard in class and how to plan lessons using the Smart Board software.

Behaviour Management

How to develop strategies for managing difficult behaviours in the classroom.

Designing a Unit of Work

We look at how to plan an entire unit of work for a whole topic.

Programming

We examine the programming for the whole school: who is responsible and how to do it.

Web Assisted Resource Design

We look at some clever ways to use the internet in our lesson planning and resource development.
